

VIKAS VERMA

Backend JavaScript Developer

Noida, India | +91 9773767632 | vikashverma209200@gmail.com

PROFESSIONAL SUMMARY

Backend JavaScript Developer with 4+ years of experience building backend systems, REST APIs, and web applications using Node.js, Express.js, TypeScript, MongoDB, and MySQL. Experienced in API integrations, authentication, role-based access control, database optimization, cloud deployment, and Agile product delivery. Currently contributing to enterprise products at POSHN and AI-driven workflow development through OrionAI.

CORE SKILLS

Languages: JavaScript, TypeScript, SQL

Backend: Node.js, Express.js, REST API Development, Authentication, RBAC, API Integrations

Frontend: HTML, CSS

Databases: MongoDB, MySQL

Cloud & Tools: GCP, Docker, Git, GitHub, Bitbucket, Jira, Postman

PROFESSIONAL EXPERIENCE

Software Developer | POSHN

2024 - Present

Noida, India

- Develop and maintain backend services and REST APIs using Node.js, Express.js, and TypeScript to support core business workflows and platform operations.
- Design MongoDB schemas, aggregation pipelines, and optimized queries for scalable production data handling and reporting.
- Implement secure application flows with authentication, role-based access control, and third-party integrations for internal and customer-facing modules.
- Collaborate with product, frontend, and cross-functional teams in Agile release cycles using Jira and Bitbucket for task tracking and delivery workflows.

OrionAI | AI Productivity & Workflow Platform

- Contribute to backend architecture, workflow execution, and connected-app integrations for an AI platform focused on centralized chat, automation, and task execution.
- Support scalable product development for AI-assisted workflows, platform reliability, and extensible feature delivery.

Software Developer | Excellence Technologies

2022 - 2024

Noida, India

- Built and maintained backend applications using Node.js and Express.js, delivering scalable APIs and business logic for web products.
- Designed and optimized MySQL schemas and queries to improve application performance, data storage, and retrieval efficiency.
- Supported cloud deployment and backend service reliability using AWS and Firebase Functions in production environments.
- Worked with cross-functional teams in Agile development cycles to deliver features, fixes, and platform improvements.

SELECTED PROJECTS

ColivHQ | Node.js, Express.js, MySQL, AWS, Firebase Functions

- Developed and maintained server-side logic using Node.js and Express.js, ensuring a robust and scalable backend architecture.
- Implemented MySQL schema design and query optimization for efficient data storage, retrieval, and application performance.
- Created and maintained RESTful APIs to support seamless frontend-backend communication and core product functionality.
- Managed backend deployment and service performance using AWS and Firebase Functions, with a focus on speed, efficiency, and reliability.

POSHN Platform | Node.js, Express.js, TypeScript, MongoDB

- Built backend functionality for business logic, user workflows, and platform operations in production environments.
- Worked on data modeling, query optimization, and scalable backend processing to support enterprise use cases.

EDUCATION

Master of Computer Applications (MCA) | A.P.J. Abdul Kalam Technical University | 2023

Bachelor of Computer Applications (BCA) | Chaudhary Charan Singh University | 2020
